## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's argument has been found persuasive. The primary reference of Groves et al. shows the base valve assembly in figure 9a similar to the base valve assembly of the instant invention. However, the intake valve 130 of Groves is not directly engaging the cylinder end 138 as claimed; and the disc spring 144-152 biases both the cylinder end 138 and the intake valve 130 to close compression passages 132. It is found that the shock absorber of the instant invention comprising a base valve assembly wherein the valve body directly engaging the cylinder end while the outer circumferential edge of the disc spring biased against only the valve body to close a plurality of compression passages define over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
